

"Dr. Stagis has really changed my life. I went to him to fix the gaps in my front teeth because I really didn't like the way they looked. I was teased as a child, I didn't smile in photos and tried not to show my teeth when I laughed. I was always outgoing and confident but I knew things could be so much better.

When I first called, Sue took the time to answer every question that I had. Everyone there is supportive, all of the assistants - Kristy, Carol and Vanessa, and Kelly. Leslie is wonderful. She is my hygienist. It doesn't terrify me to get my teeth cleaned anymore, and she is excellent. Nita is fantastic. She works with the Dr. in getting a treatment plan together and helps you with your financial arrangements. She is such an essential part because she really helps to figure appointments out, as well as financial matters. She makes things easy and gives you lists that really make things stress free and easy to follow.

I felt Dr. Stagis has put this great team together and when you come here you not only feel part of the team you feel like the "Star of the Team!" It's all about the health of your teeth, the structure and the beauty. I was involved in all choices.

I sing in the Fresno Grand Opera. When the gaps in my teeth were closed it helped my singing, where air was escaping before, those gaps are now closed. My neck pain and severe headaches ended. I never realized what was going on because of clenching and grinding. Dr. Stagis really helped me with so much more than what I came here for. He gave me my smile back, more confidence and an office full of new friends.

I would encourage anyone not to think twice about having this done, it really has more benefits than you can ever realize. It's a life changing experience. Dr. Stagis is the most understanding supportive person I've ever met. He cares and wants to help you make your dream smile come true. He did that exact thing for me and I thank him from the bottom of my heart." Lisa O.
